

Sustainability Compliance Declaration at Completion Stage

Applicants must demonstrate compliance with the sustainability criteria outlined in section 10 of the SSRH Terms and Conditions appropriate to the fuel type and section 14.5 of the Tariff Scheme Operating Rules and Guidelines. This will be shown through the Declaration of Completion, the Operations Report, the Annual Declaration and/or any periodic inspection undertaken by SEAI.

It is intended that compliance with the sustainability obligations will be demonstrated through a recognised certification scheme however at the time of the launch of the Tariff Scheme a recognised certification scheme is not readily available. Accordingly, applicants are required to self-report against the GHG and land criteria detailed in the TSORG.

Where an applicant is self-supplying or self-processing fuel it is a requirement that, at the Completion stage the applicant confirms that all fuel used to generate Eligible Heat from the Eligible Installation complies with the fuel quality and sustainability requirements detailed in the TSORG, including, but not limited to the following:

- I. the heat produced by the Eligible Installation retains a lifecycle of greenhouse gas emissions of less than or equal to 24 gCO₂eq/MJ of heat generated; and
 - II. the biomass or biogas fuel, used by the Eligible Installation, continues to satisfy the specific land criteria.
- This Completion Declaration will be supported at the appropriate time by the Operational Report (submitted by the applicant every 6 months) and the Annual Declaration (submitted by the applicant every 12 months).
 - It is expected that the Applicant will demonstrate a Greenhouse Gas calculation for the self-sourced fuel at the time of the Annual Declaration.
 - The Sustainability and fuel quality requirements of the Scheme are outlined in further detail in the TSORG.

Name of Applicant: _____

SSRH Application Reference: SSRH_____

Brief description of the fuel source:

Brief description of the fuel processing steps:

I confirm that the fuel meets all land use criteria: Yes No

I commit to maintain full stock management records, including quantity and source, of all fuel used:
 Yes No

Signature:

Date:
