

2017 Performance of the Large Industry Energy Network

Each year, members of our network are supported by SEAI to reduce their carbon emissions and energy spend, and report these performance figures to SEAI.

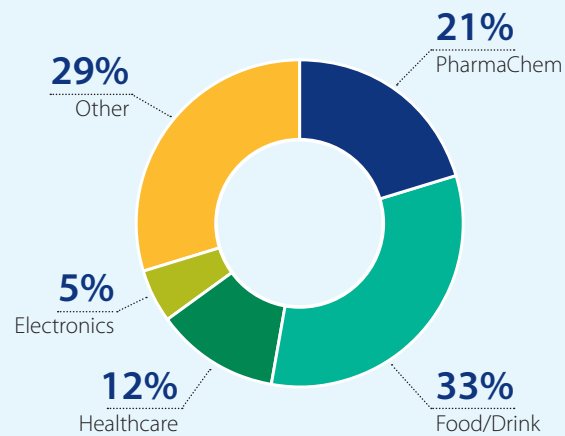

The Network

200

network members

NETWORK MEMBERSHIP BY SECTOR

138,000

people are employed by network members

21%

of national total primary energy requirement

Energy Performance (Compared to 2016)

5.4%

energy performance improvement for the network members

1,436 GWh

reduction in primary energy consumption, at a time of increasing output

Energy Saving Projects

255

projects implemented

82,700

tonnes estimated CO₂ emissions avoided

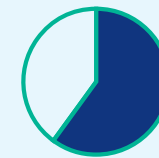

€14.5m

estimated energy spend avoided

Performance of ISO 50001 certified members

76

members...

... accounted for

60%

of network energy consumption

22%

energy performance gains
